

## Pacific North West Capital Completes Deep Penetrating UTEM 3 Geophysical Survey Over West Timmins, Nickel Project, Ontario

September 15, 2008, Vancouver, BC – Pacific North West Capital Corp. (PFN) (TSX: PFN; OTCBB: PAWEF; Frankfurt: P7J) is pleased to report that a deep penetrating UTEM 3 survey has been completed in a continuing program to evaluate the Ni-Cu potential of the Montcalm Intrusive south of the Montcalm Cu-Ni Mine an area not thoroughly evaluated in the past (see map). The geophysical survey covered a complex sequence of mafic and ultramafic intrusive rocks which are considered to be a favorable host for magmatic Ni-Cu deposits. The data is now being interpreted with the assistance of Xstrata Nickel to define drill targets. On completion of the data evaluation, potential conductors, selected as targets are anticipated to be drill tested in a winter drill program.

The cost of the geophysical program was shared on a 50:50 basis with Xstrata Nickel. Subsequent drilling programs will be funded 100% by PFN, as part of its work commitment under the terms of the Option Agreement.
